Terrier Tamora Pierce, 2007-10-23 BEKA COOPER IS a rookie with the Provost's Guard, and she's been assigned to the Lower City. It's a tough beat, but Beka can hear the voices of the dead on the wings of pigeons, and Beka's birds clue her in to two major murderers on the loose. The rest of the Guard is busy investigating the fire opal killer, so it's up to Beka to nab the Shadow Snake. Tamora Pierce begins a new Tortall trilogy introducing Beka Cooper, a young woman who lived 200 years before Pierce's popular Alanna character. Pierce employs first-person narration, bringing readers even closer to a character that they will love for her unusual talents and tough personality.

Donner Dinner Party (Nathan Hale's Hazardous Tales #3) Nathan Hale, 2013-08-06 The Donner Party expedition is one of the most notorious stories in all of American history. It's also a fascinating snapshot of the westward expansion of the United States, and the families and individuals who sacrificed so much to build new lives in a largely unknown landscape. From the preparation for the journey to each disastrous leg of the trip, this book shows the specific bad decisions that led to the party's predicament in the Sierra Nevada Mountains. The graphic novel focuses on the struggles of the Reed family to tell the true story of the catastrophic journey. This popular topic is a perfect addition to the Nathan Hale's Hazardous Tales brand, and a great showcase for Hale's storytelling skills. Praise for Nathan Hale's Hazardous Tales: Donner Dinner Party This informative graphic novel capitalizes on enticingly gross history to great effect, balancing raw facts with strong storytelling. --Booklist Awards YALSA's Great Graphic Novels for Teens List 2014 New York Public Library's list: Children's Books list: 100 Titles for Reading and Sharing 2013 Notable Social Studies Trade Books for Young People 2014

Women Don't Ask Linda Babcock, Sara Laschever, 2021-01-05 The groundbreaking classic that explores how women can and should negotiate for parity in their workplaces, homes, and beyond When Linda Babcock wanted to know why male graduate students were teaching their own courses while female students were always assigned as assistants, her dean said: More men ask. The women just don't ask. Drawing on psychology, sociology, economics, and organizational behavior as well as dozens of interviews with men and women in different fields and at all stages in their careers, *Women Don't Ask* explores how our institutions, child-rearing practices, and implicit assumptions discourage women from asking for the opportunities

and resources that they have earned and deserve—perpetuating inequalities that are fundamentally unfair and economically unsound. *Women Don't Ask* tells women how to ask, and why they should.

The Geek Manifesto Mark Henderson, 2013 Britain's leading science journalist makes an agenda-setting argument that science matters to every aspect of politics with a rallying call to all geeks, wannabe geeks, and secret geeks to join together in a new force our leaders cannot ignore. There has never been a better time to be a geek (or a nerd, or a dork). What was once an insult used to marginalize those curious people (in either sense of the word) and their obsessive interest in science has increasingly become a badge of honor. And we should be crying out for them. England is a country where only one of 650 MPs has worked as a research scientist, the government's drug adviser was sacked for making a decision based on scientific fact rather than public opinion, a writer can be forced into court for telling the scientific truth, and the media would rather sell papers by scaremongering over MMR vaccines and GM crops than report the less sensational facts. Whether one wants to improve education, cut crime, enhance public health, or generate clean energy, science and its experimental method is critical. It's time to stop the nonsense *The Geek Manifesto* explains what needs to happen to entrench scientific thinking more deeply into politics and society; and how those who are concerned can turn their frustrated outrage into positive action that our country's leaders cannot ignore. Contributors include Ben Goldacre, Simon Singh, Robin Ince, Evan Harris, Tim Harford, Brian Cox, and Sir Paul Nurse.

So Good They Can't Ignore You Cal Newport, 2016-12-01 Cal Newport's clearly-written manifesto flies in the face of conventional wisdom by suggesting that it should be a person's talent and skill - and not necessarily their passion - that determines their career path. Newport, who graduated from Dartmouth College (Phi Beta Kappa) and earned a PhD. from MIT, contends that trying to find what drives us, instead of focusing on areas in which we naturally excel, is ultimately harmful and frustrating to job seekers. The title is a direct quote from comedian Steve Martin who, when once asked why he was successful in his career, immediately replied: Be so good they can't ignore you and that's the main basis for Newport's book. Skill and ability trump passion. Inspired by former Apple CEO Steve Jobs' famous Stanford University commencement speech in which Jobs urges idealistic grads to chase their dreams, Newport takes issue with that advice, claiming that not only is this advice Pollyannish, but that Jobs himself never followed his own advice. From there, Newport presents compelling scientific and contemporary case study evidence that the key to one's career success is to find out what you do well, where you have built up your 'career capital,' and then to put all of your efforts into that direction.

The God Particle Leon M. Lederman, Dick Teresi, 2006 A fascinating tour of particle physics from Nobel Prize winner Leon Lederman. At the root of particle physics is an invincible sense of curiosity. Leon Lederman embraces this spirit of inquiry as he moves from the Greeks' earliest scientific observations to Einstein and beyond to chart this unique arm of scientific study. His survey concludes with the Higgs boson, nicknamed the God Particle, which scientists hypothesize will

help unlock the last secrets of the subatomic universe, quarks and all--it's the dogged pursuit of this almost mystical entity that inspires Lederman's witty and accessible history.

Retreat and Rearguard, 1914 Jerry Murland, 2011-12-13 The British action at Mons on 23 August 1914 was the catalyst for what became a full blown retreat over 200 blood drenched miles. This book examines eighteen of the desperate rearguard actions that occurred during the twelve days of this near rout. While those at Le Cateau and Nery are well chronicled, others such as cavalry actions at Morsain and Taillefontaine, the Connaught Rangers at Le Grand Fayt and 13 Brigades fight at Crepy-en-Valois are virtually unknown even to expert historians. We learn how in the chaos and confusion that inevitably reigned units of Gunners and other supporting arms found themselves in the front line. The work of the Royal Engineers responsible for blowing bridges over rivers and canals behind the retreating troops comes in for particular attention and praise. Likewise that of the RAMC. No less than 16 VCs were won during this historic Retreat, showing that even in the darkest hours individuals and units performed with gallantry, resourcefulness and great forbearance. The book comes alive with first hand accounts, letters, diaries, official unit records, much of which has never been published before.

The Data Journalism Handbook Jonathan Gray, Lucy Chambers, Liliana Bounegru, 2012-07-12 When you combine the sheer scale and range of digital information now available with a journalist's nose for news and her ability to tell a compelling story, a new world of possibility opens up. With *The Data Journalism Handbook*, you'll explore the potential, limits, and applied uses of this new and fascinating field. This valuable handbook has attracted scores of contributors since the European Journalism Centre and the Open Knowledge Foundation launched the project at MozFest 2011. Through a collection of tips and techniques from leading journalists, professors, software developers, and data analysts, you'll learn how data can be either the source of data journalism or a tool with which the story is told—or both. Examine the use of data journalism at the BBC, the Chicago Tribune, the Guardian, and other news organizations Explore in-depth case studies on elections, riots, school performance, and corruption Learn how to find data from the Web, through freedom of information laws, and by crowd sourcing Extract information from raw data with tips for working with numbers and statistics and using data visualization Deliver data through infographics, news apps, open data platforms, and download links

High Quality Care for All Secretary of State for Health, 2008 This review incorporates the views and visions of 2,000 clinicians and other health and social care professionals from every NHS region in England, and has been developed in discussion with patients, carers and the general public. The changes proposed are locally-led, patient-centred and clinically driven. Chapter 2 identifies the challenges facing the NHS in the 21st century: ever higher expectations; demand driven by demographics as people live longer; health in an age of information and connectivity; the changing nature of disease; advances in treatment; a changing health workplace. Chapter 3 outlines the proposals to deliver high quality care for patients and the public, with an emphasis on helping people to stay healthy, empowering patients, providing the most

effective treatments, and keeping patients as safe as possible in healthcare environments. The importance of quality in all aspects of the NHS is reinforced in chapter 4, and must be understood from the perspective of the patient's safety, experience in care received and the effectiveness of that care. Best practice will be widely promoted, with a central role for the National Institute for Health and Clinical Excellence (NICE) in expanding national standards. This will bring clarity to the high standards expected and quality performance will be measured and published. The review outlines the need to put frontline staff in control of this drive for quality (chapter 5), with greater freedom to use their expertise and skill and decision-making to find innovative ways to improve care for patients. Clinical and managerial leadership skills at the local level need further development, and all levels of staff will receive support through education and training (chapter 6). The review recommends the introduction of an NHS Constitution (chapter 7). The final chapter sets out the means of implementation.

Singing in the Lower Secondary School Martin Ashley, 2015 This is an essential text on an important area of the music curriculum consistently judged weak or inadequate by school inspectors in Britain. It covers social, physiological, musical, and pedagogical aspects of young adolescent singing, with focus on Key Stage 3 (ages 11-14) and the progression from primary school. Grounded in extensive research and authoritatively written, it uses case studies to illustrate best practice, and introduces the principles of *cambiata*, a dedicated approach to the adolescent voice. Other chapters contain practical and proven advice on repertoire, technique, and the motivation of reluctant singers, boosting the confidence of teachers for whom choral work is not the main specialism.

College Andrew Delbanco, 2023-04-18 The strengths and failures of the American college, and why liberal education still matters As the commercialization of American higher education accelerates, more and more students are coming to college with the narrow aim of obtaining a preprofessional credential. The traditional four-year college experience—an exploratory time for students to discover their passions and test ideas and values with the help of teachers and peers—is in danger of

becoming a thing of the past. In *College*, prominent cultural critic Andrew Delbanco offers a trenchant defense of such an education, and warns that it is becoming a privilege reserved for the relatively rich. In describing what a true college education should be, he demonstrates why making it available to as many young people as possible remains central to America's democratic promise. In a brisk and vivid historical narrative, Delbanco explains how the idea of college arose in the colonial period from the Puritan idea of the gathered church, how it struggled to survive in the nineteenth century in the shadow of the new research universities, and how, in the twentieth century, it slowly opened its doors to women, minorities, and students from low-income families. He describes the unique strengths of America's colleges in our era of globalization and, while recognizing the growing centrality of science, technology, and vocational subjects in the curriculum, he mounts a vigorous defense of a broadly humanistic education for all. Acknowledging the serious financial, intellectual, and ethical challenges that all colleges face today, Delbanco considers what is at stake in the urgent effort to protect these venerable institutions for future generations.

The Cambridge Guide to Homer Corinne Ondine Pache, Casey Dué, Susan Lupack, Robert Lamberton, 2020-03-05 From its ancient incarnation as a song to recent translations in modern languages, Homeric epic remains an abiding source of inspiration for both scholars and artists that transcends temporal and linguistic boundaries. The Cambridge Guide to Homer examines the influence and meaning of Homeric poetry from its earliest form as ancient Greek song to its current status in world literature, presenting the information in a synthetic manner that allows the reader to gain an understanding of the different strands of Homeric studies. The volume is structured around three main themes: Homeric Song and Text; the Homeric World, and Homer in the World. Each section starts with a series of 'macropedia' essays arranged thematically that are accompanied by shorter complementary 'micropedia' articles. The Cambridge Guide to Homer thus traces the many routes taken by Homeric epic in the ancient world and its continuing relevance in different periods and cultures.

Simple & Direct Jacques Barzun, 1985 After a lifetime of writing and editing prose, Jacques Barzun has set down his view of the best ways to improve one's style. His discussions of diction, syntax, tone, meaning, composition, and revision guide the reader through the technique of making the written word clear and agreeable to read. Exercises, model passages both literary and casual, and hundreds of amusing examples of usage gone wrong show how to choose the right path to self-expression in forceful and distinctive words.

A Historical Review and Analysis of Army Physical Readiness Training and Assessment Whitfield East, 2013-12 The Drillmaster of Valley Forge-Baron Von Steuben-correctly noted in his Blue Book how physical conditioning and health (which he found woefully missing when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance

of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield Chip East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do-and how we do it-in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly "unfit, due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.

Governing Human Well-Being Nisha Bellinger, 2017-12-05 This book provides a comprehensive explanation of human well-being outcomes by analyzing the role of domestic and international political factors. The well-being outcomes under study are the building blocks of development, and play a crucial developmental role in the lives of citizens, states, and the global community. The project introduces cases from Brazil, Japan, China, and Iraq, and proposes to answer some of the pressing questions that scholars and policy-makers alike have pondered over for years. Why are there large disparities between countries in the quality of life people lead? What factors account for the general well-being of mankind? How do we improve human lives?

Sport: Law and Practice Adam Lewis, Jonathan Taylor, 2014-01-31 This comprehensive textbook covers sports law in England and Wales, consolidating guidance across all the major practice areas of interest to sports lawyers, and discussing the effect of European legislation.

Native Women Changing Their Worlds Patricia J. Cutright, 2022-06-15 Native women have filled their communities with strength and leadership, both historically and as modern-day warriors. The twelve Indigenous women featured in this book overcame unimaginable hardships--racial and gender discrimination, abuse, and extreme poverty--only to rise to great heights in the fields of politics, science, education, and community activism. Such determination and courage reflect the essence of the traditional Cheyenne saying: "A nation is not conquered until the hearts of its women are on the ground." The impressive accomplishments of these twelve dynamic women provide inspiration for all. B/W photos. Featured individuals: Ashley Callingbull Burnham (Enoch Cree Nation) Henrietta Mann, PhD (Southern Cheyenne) Ruth Anna Buffalo (Mandan,

Hidatsa, Arikara Nation) Elouise Pepion Cobell (Blackfeet) Lorie Roy, PhD (Anishinabe, White Earth Reservation) Sharice Davids (Ho-Chunk Nation) Roberta Jamieson (Kanyenkehaka, Six Nations-Grand River Territory) Deb Haaland (Pueblo of Laguna) Elsie Marie Knott (Mississauga Ojibwe) Mary Golda Ross (Cherokee) Heather Dawn Thompson (Lakota, Cheyenne River Sioux Emily Washines (Yakama Nation with Cree and Skokomish lineage).

Becoming Abolitionists Derecka Purnell, 2021-10-05 A NONAME BOOK CLUB PICK Named a Kirkus Reviews Best Book of 2021 *Becoming Abolitionists* is ultimately about the importance of asking questions and our ability to create answers. And in the end, Purnell makes it clear that abolition is a labor of love—one that we can accomplish together if only we decide to. —Nia Evans, Boston Review For more than a century, activists in the United States have tried to reform the police. From community policing initiatives to increasing diversity, none of it has stopped the police from killing about three people a day. Millions of people continue to protest police violence because these solutions do not match the problem: the police cannot be reformed. In *Becoming Abolitionists*, Purnell draws from her experiences as a lawyer, writer, and organizer initially skeptical about police abolition. She saw too much sexual violence and buried too many friends to consider getting rid of police in her hometown of St. Louis, let alone the nation. But the police were a placebo. Calling them felt like something, and something feels like everything when the other option seems like nothing. Purnell details how multi-racial social movements rooted in rebellion, risk-taking, and revolutionary love pushed her and a generation of activists toward abolition. The book travels across geography and time, and offers lessons that activists have learned from Ferguson to South Africa, from Reconstruction to contemporary protests against police shootings. Here, Purnell argues that police can not be reformed and invites readers to envision new systems that work to address the root causes of violence. *Becoming Abolitionists* shows that abolition is not solely about getting rid of police, but a commitment to create and support different answers to the problem of harm in society, and, most excitingly, an opportunity to reduce and eliminate harm in the first place.
